CAREER OBJECTIVE

Hi! I am Moe Yu, a Computer Engineering graduate building backend systems with Python, FastAPI, MongoDB, and MySQL. Contributed to an AI-powered analytics platform at Codigo integrating OpenAI, Claude, and Groq, validating 230+ business queries. Now at DVB Association, building database features and Tableau dashboards for research reporting.

WORK EXPERIENCE

Data Analyst & Software Engineering Intern, DVB Association | Jun 2026 – Present

- Plan and build backend and database structures for content-management and reporting modules.
- Clean and validate MIMU and internal datasets for Tableau maps, dashboards, and analytical reports, and build web scrapers to keep them current.

Backend Developer Intern, Codigo Pte. Ltd. (Remote, Singapore) | Jan 2026 - April 2026

- Contributed to an AI-powered business analytics platform (Python, FastAPI, MongoDB) using a provider-agnostic design across OpenAI, Claude, and Groq.
- Improved natural-language query handling, intent classification, and response quality in the Chat and Chat V2 APIs.
- Tested and validated 230+ analytics queries across revenue, customer, operational, and financial domains to improve answer accuracy.
- Debugged APIs and verified AI outputs with Swagger UI, Postman, and MongoDB Compass, working directly with the Technical Lead.

Freelance Transcriber | Project Manager, Productive Playhouse, Inc. | 2022–2023

- Led two transcription projects of 25–30 people each, delivering 2,300+ Burmese audio files (30 min each) under 6-month deadlines at 99% linguistic accuracy.

EDUCATION

Bachelor of Engineering in Computer Engineering,

Mae Fah Luang University, Chiang Rai, Thailand (Graduated June 2026)

- GPAX: 3.79/4.0
- Degree Completed

PROJECTS

Automated Cryptocurrency Trading Bot , Python — Senior Research Project

2024 – 2025

- Built a Binance trading bot (Python, CCXT) with 6 strategies, including a custom RSI_Pivot combining pivot points, RSI momentum, and EMA trend.
- Backtested 5 years of SOL/USDT hourly data: EMA Crossover returned +87.5% in the 2021 bull market; RSI_Pivot was the most consistent across all conditions.

- Added a 2-of-3 majority-vote mode across all 10 strategy combinations to cut false signals, plus 4 real-time monitoring modules with CSV logging.
- Directory: [Project Documentation](#) 

Image Processing & Human Action Recognition App , Academic Project

2024

- Built a Python/Tkinter desktop app with a classmate, replacing a MATLAB workflow, covering enhancement, edge detection (Sobel, Canny, Otsu), and transformations.
- Integrated MediaPipe Pose to recognize five poses in real time.

Sport Equipment Lending App , Flutter App

2023 – 2024

- Built a cross-platform Android/iOS app for borrowing and returning sport equipment, with login, equipment browsing, reservations, borrowing history, and profile management.
- Connected to a REST backend over HTTP with JWT authentication and secure token storage, using GetX for state management and fl_chart for dashboard charts.

Library Room Reservation System , Web App

2023 – 2024

- Built a room-booking website for university students using HTML, CSS, JavaScript, and MySQL.
- Handled both the frontend interface and the backend database logic, including user sessions and real-time availability.
- The system was used by students to book library rooms, which reduced scheduling conflicts.

SKILLS

Technical Skills

- **Programming:** Python, Java, JavaScript, SQL
- **Backend:** FastAPI, REST APIs, Pydantic, Async Python
- **Databases:** MongoDB, MySQL
- **Web & Mobile:** HTML, CSS, React, Flutter
- **AI / ML:** OpenAI API, Claude API, Groq API, Scikit-learn, OpenCV, MediaPipe
- **Data:** Pandas, Matplotlib, Tableau, data cleaning and validation, web scraping
- **Tools:** Git, GitHub, Postman, Swagger UI, MongoDB Compass, Nginx, Jupyter Notebook, VS Code, Claude Code

Soft Skills & Languages

- **Soft Skills:** Quick Learner, Teamwork, Adaptability, Time Management, Flexibility
- **Languages:** Burmese (Native), English(Fluent) , Japanese (currently studying N4)
